

DEEP TISSUE LASER THERAPY

- DRUG FREE
- SURGERY FREE
- PAIN FREE

Feel the difference of deep tissue laser therapy, a unique & powerful approach to treat injuries, pain & inflammation.

Testimony

"I have been suffering sleepless with pain on both my legs due to diabetic neuropathy, I have tried various treatments and nothing worked. Finally my friend recommended for this deep tissue laser which has given me relief & I am happy I get to sleep well now."

Alli

" I had diabetic wound in both my legs & my doctor suggested for amputation. I decided to get a second opinion in Assunta. The doctor saved my legs from amputation & also helped in fast recovery by recommending me to the laser therapy in Rehab department. I am thankful to all those who helped me."

What is deep tissue laser therapy (DTLT)?

Laser therapy is the non-invasive use of laser energy to generate a photochemical response in damaged or dysfunctional tissue. It is a FDA cleared modality that reduces inflammation and reduce pain. This unique therapy can be used as:

- i An adjunct to prescription drugs.
- ii A pre-surgery treatment or substitute for surgery.
- iii Post surgery treatment to accelerate healing
- iv A long term pain management.
- v Acute injury treatment.
no longer effective in relieving your symptoms.

What is deep tissue laser therapy (DTLT)?

- Reduce inflammation.
- Effective pain relief
- Accelerated tissue repair & cell growth
- Improved vascular activity
- Reduce scar tissue
- Nerve regeneration
- Immuno regulation
